§ 22.11 *Defined.* For the purpose of these regulations, viruses, serums, toxins, antitoxins, and analogous products applicable to the prevention or cure of diseases of man are referred to as biologic products and defined as follows: (a) A virus is a product containing the minute living cause of an infectious disease. (b) A serum is the product obtained from the blood of an animal by removing the clot or clot components and the blood cells. (c) A toxin is a product containing a soluble substance poisonous to laboratory animals or to man in doses of 1 milliliter or less of the product, and having the property, following the injection of nonfatal doses into an animal, of causing to be produced therein another soluble substance which specifically neutralizes the poisonous substance and which is demonstrable in the serum of the animal thus immunized. (d) An antitoxin is a product containing the soluble substance in the serum or other body fluid of an immunized animal which specifically neutralizes the toxin against which the animal is immune. (e) A product is analogous (1) to a virus if prepared from a virus, including micro-organisms actually or potentially virulent; (2) to a serum, if prepared from some protein constituent of the blood and intended for parenteral administration; (3) to a toxin or antitoxin, if intended, by parenteral administration, for the prevention or treatment of disease through specific immunization.*† [Par. 7]

NOTICE OF EXTENSION OF SPECIAL CERTIFICATES FOR THE EMPLOYMENT OF LEARNERS IN THE APPAREL, GLOVE, TEXTILE AND KNITTED WEAR INDUSTRIES ISSUED UNDER REGULATIONS—PART 522

Whereas, special certificates authorizing the employment of learners in the apparel, glove, textile and knitted wear industries at hourly wages lower than the minimum wage applicable under section 6 of the Fair Labor Standards Act of 1938 have been issued to employers under orders which provide that such special certificates shall be valid until October 24, 1940, unless cancelled or modified for cause by the Administrator or his authorized representative, and

Whereas, in order to give employers adequate opportunity to reapply for new

certificates in these industries, it is necessary in order to prevent curtailment of opportunities for employment that the said special certificates be continued in full force and effect after the date of expiration thereof.

Now, therefore, it is ordered that said special certificates for the employment of learners in the apparel, glove, textile and knitted wear industries at wage rates less than the minimum wage applicable under section 6 of the Fair Labor Standards Act of 1938 be continued in full force and effect until the date of December 24, 1940 and shall be valid until that date unless cancelled or modified for cause by the Administrator or his authorized representative.

Signed at Washington, D. C., this 15th day of October, 1940.

[Docket No. F.D.C. 22]

IN THE MATTER OF AMENDMENT OF DEFINITION AND STANDARD OF IDENTITY FOR TOMATO CATSUP SO AS TO PERMIT THE USE THEREIN OF SODIUM BENZOATE AS AN OPTIONAL INGREDIENT

PROPOSED ORDER

Upon the basis of the evidence of record at the hearing in the above-entitled matter, duly held pursuant to notice thereof,¹ it is proposed that the following

facts be found and that the following order be made:

Proposed Findings of Fact

1. That tomato catsup is a concentrated product, and that concentration is an essential characteristic of tomato catsup. R. pp. 57-58; Definition and Standard, 4 F.R. 3454.)

2. That the extent to which tomato catsup is concentrated bears upon the keeping qualities which the catsup has after being opened and while being held for use. (R. pp. 53, 55-56, 58, 61, 77.)

3. That tomato catsup of a low degree of concentration is more susceptible to spoilage than tomato catsup of a high degree of concentration. (R. pp. 33, 41-42, 47-49, 52.)

4. That, after being opened for use, tomato catsup made to a proper degree of concentration keeps, under normal conditions of use, for a period of six to eight weeks, or more, and longer than the period within which the catsup is ordinarily consumed. (R. pp. 35, 52, 58-59, 62.)

5. That, when tomato catsup of proper concentration, which has been properly processed and packaged, spoils after being opened and within the time ordinarily required for its consumption, such spoilage is due to careless handling and contamination with organisms the development of which cause spoilage. (R. pp. 32-43, 73-77.)

6. That benzoate of soda is not used in tomato catsup for the purpose of preventing spoilage before the catsup is opened for use. (R. pp. 13, 32, 36, 51, 74-76.)

7. That, when used in tomato catsup, benzoate of soda is used for the purpose of giving to tomato catsup of low concentration the keeping qualities naturally possessed by catsup of a higher degree of concentration, and of imparting to the catsup a preservative against the effects of careless handling and contamination after being opened and while being held for use. (R. pp. 6-7, 13, 21, 32-43, 46, 51-52, 76.)

Proposed Order

It appearing from the foregoing findings of fact that an amendment of the definition and standard of identity for tomato catsup² so as to permit the use therein of sodium benzoate as an optional ingredient will not promote honesty and fair dealing in the interest of consumers, it is

Ordered, That no amendment of the definition and standard of identity for tomato catsup² be made as a result of this hearing.

Any interested person whose appearance was filed at the hearing may, within 20 days from the date of the publication of this proposed order in the FEDERAL

¹ 5 F.R. 2809.

² 4 F.R. 3454.

REGISTER, file with the Hearing Clerk of the Federal Security Agency, Office of the Assistant General Counsel, Room 2240, South Building, 14th Street and Independence Avenue, Washington, D. C., exceptions to this proposed order. Exceptions shall point out with particularity the alleged errors in the proposed order, and shall contain a specific reference to the page of the transcript of the testimony or to the exhibit on which such exception is based. Such exceptions may be accompanied with a memorandum brief in support thereof.
